Ghana	gha

STUDY TYPE

Socio-Economic/Monitoring Survey [hh/sems]

ABSTRACT

The Ghana Socioeconomic panel household survey is a joint effort between the Economic Growth Center at Yale University and the Institute of Statistical, Social and Economic Research at Legon (Accra, Ghana). The survey is meant to remedy a major constraint on the understanding of development in low-income countries - the absence of detailed, multi-level and long-term scientific data that follows individuals over time and describes both the natural and built environment in which the individuals reside. Most data collection efforts are short-term - carried out at one point in time; are limited in scope - collecting information on only a few aspects of the lives of the persons in the study; and when there are multiple rounds of data collection, individuals who leave the study area are dropped. This latter means that the most mobile people are not included in existing surveys and studies, perhaps substantially biasing inferences about who benefits from and who bears the cost of the development process. The goal of this project, which aims to follow all individuals, or a random subset, over time using a comprehensive set of survey instruments is thus to shed new light on long-run processes of economic development.

KIND OF DATA

Sample survey data

UNIT OF ANALYSIS

Households and individuals

Version

VERSION DESCRIPTION

Version 1

VERSION DATE

2021

Scope

NOTES

The Household Questionnaire Part A collected on household members, including information on Non-resident Relatives and Spouses.

The Household Questionnaire Part B collected the following data:

Household assets – Farm assets and financial assets

Agricultural production - plot, land tenure, inputs, labor, harvest, crop stores and sales,

Non-farm Household Enterprises-types, assets and finance, labor, revenue and expenses,

Household health - Insurance, Anthropometry, Immunization, Activities of Daily Living,
 Miscellaneous Health, Health in the Past 2 Weeks, Health in Last 12 Month,
 Women's health - fertility and power relations,
 Men's health - reproductive health and power relations,
 Children's module-health, Digit Span test, Raven's Pattern Cognitive Assessment,
 Psychology and Social Networking - psychology, personality questions, social networking and information seeking,
 Household Consumption and Expenditure and
 Housing characteristics

Coverage

GEOGRAPHIC COVERAGE

The survey is nationally representative

GEOGRAPHIC UNIT

The data is at the level of district and community
